Oreck Litter Ex for Cats

Manufacturer : ORECK

Oreck Litter Ex® for Cats Removes the ammonia odor in litter boxes and more. The alanite crystals in LitterEx naturally eliminate virtually any odor without using chemicals, fragrances, or perfumes. This amazing mineral from Mother Nature is a negative ion material which attracts and absorbs odors, instead of just covering them up. It can be used anywhere that odor or moisture is a problem. It extends the usable life of kitty litter as it removes odors caused by pets, and it's perfectly safe and natural for your pet. How it Works: Airborne odors caused by pet wastes, bacterial decomposition and other sources "piggyback" a free ride on dust particles, which have a positive molecular ion charge. The alanite crystals in LitterEx have a negative ion charge, which attracts these dust particles and their unwelcome riders, cleaning the immediate environment of their odors. LitterEx is approved for disposal with normal household waste. Oreck
